AB The coatings are based on ~~carboxyl~~ group-contg.polyester (acid no. 10-150 mg KOH/g) (35.0-92.2) low mol.wt. epoxy group-contg. hardener (0.8-20.13) epoxy group-contg.

polyacrylate

resin (epoxy equiv. wt. 350-2000) (3.7-49.3) and di- and/or polycarboxylic acid/anhydride 0.5-13.6%. The coatings permit metal forming operations after baking. Thus, a Me methacrylate-glycidyl methacrylate- Bu acrylate-styrene copolymer was prep'd. and formulated with Uralac P5000 (carboxyl-contg. polyester), triglycidyl isocyanurate, dodecanedioic acid, and additives, applied as a powder to steel, and baked at 205.degree. to provide a shiny coating.
